Entry/Exit Fees [3]	None

[1] The ETP's NAV U.S. dollar value is determined at 4.00 pm CET of each business day, and represents the value of one unit; it is calculated by using the relevant spot price of the underlying digital asset. The value is not necessarily the same as the ETP's intraday trading price. Investors should not expect to buy or sell the ETP at the determined NAV value.

[2] Please consult the Prospectus for a comprehensive explanation of all fees

[3] Your broker may charge commissions to buy and sell the ETP

Bitwise Lighter Staking ETP

Bitwise®

Investment Objective

The Bitwise Lighter Staking ETP (BLIT) is a physically backed exchange-traded product that aims to provide investors with exposure to LIT, the native token of the Lighter Network. The ETP is fully backed by LIT held in cold-storage custody, and its pricing aims to reflect the value of the underlying asset, as determined by the appointed price reference benchmark, after fees and expenses.

Important Information

The Bitwise Lighter Staking ETP does not currently stake its underlying LIT token holdings. The product is structured to support staking activity, and staking may be enabled at a later date, subject to further notice. Until staking is enabled, the ETP provides price exposure to LIT only, without any staking-related returns. Any change to this status will be communicated accordingly, together with all relevant details.

Investments in digital assets involve significant risks, including high volatility and the potential loss of the entire invested capital.

Lighter (LIT) exposure through a regulated ETP

1. **Trade Like Shares**. Tradable on stock exchanges through standard securities accounts, similar to shares or ETFs. No crypto wallet is required. Platform availability may vary.
2. **Physical ETP Structure**. Each ETP is fully backed by digital assets and includes a physical redemption feature.
3. **Cold-Storage Custody**. Assets are held with a regulated custodian, segregated from the issuer's own assets. A trustee oversees custody arrangements and helps protect investor claims in the event of issuer default.
4. **Regulatory Framework**. With a base prospectus approved by the German financial authority, the ETP is listed and tradable on one or more European stock exchanges. Investors should note that while the ETP is listed on regulated exchanges, the underlying cryptoassets are not regulated.
5. **Proof of Holdings**. Weekly balance reports by an independent administrator provide investors with full transparency into assets held in custody. Learn more

BLIT Performance

Period	NAV
Since inception [4]	-23.05%

[4] Inception Date 2026-09-22

Year	NAV
YTD [5]	-23.05%

[5] YTD performance calculated from Inception Date

Past performance is not a reliable indicator of future results. Performance shown reflects net asset value (NAV) returns, based on data from Bitwise. Year-to-date performance is calculated from the first of January, or from the inception date if the product was launched after the 1st of January of a given year; performance since inception reflects NAV from the inception date. NAV is displayed in the base currency (USD); price performance may be shown in a different currency, such as EUR. Current performance may differ from the figures shown. Transaction costs and brokerage fees may apply. Your capital is at risk.

About Bitwise

Bitwise is one of the world's leading crypto specialist asset managers. Thousands of financial advisors, family offices, and institutional investors across the globe have partnered with us to understand and access the opportunities in crypto. Since 2017, Bitwise has established a track record of excellence managing a broad suite of delta-one, index and active solutions across ETPs, ETFs, separately managed accounts, private funds, and hedge fund strategies, spanning both the U.S. and Europe.

[8] Possible against the underlying cryptocurrency or in cash in cases where redemption in cryptocurrency is not possible for regulatory reasons.

RISK WARNINGS

Investors should be aware that investing in crypto assets involves significant risks, including but not limited to:

- Volatility Risk: The price of crypto assets and crypto exchange traded products (ETPs) can fluctuate significantly.
- Liquidity Risk: Market depth and trading volumes may vary, affecting execution.
- Custody Risk: Despite institutional-grade custody, digital assets may be vulnerable to cyber threats.
- Regulatory Risk: Crypto assets and their treatment are subject to evolving regulatory frameworks.
- Market Risk: Broader market movements can impact the value of the ETP.
- Lock-up periods where assets may not be immediately redeemable.
- Slashing risk, where misbehavior or validator error may result in partial loss of staked funds.
- Network or protocol changes that may affect staking rewards or availability.

While there may be potential for significant gains, you are at risk of losing part of or your entire capital invested. For complete information please refer to the relevant Final Terms and the Base Prospectus.

Investing in crypto-linked products is high risk and you could lose some or all of your investment. Crypto markets are highly volatile and prices can move sharply and unpredictably. Liquidity may be limited, which can affect your ability to buy or sell at the price you expect. There are additional risks relating to the product structure (including issuer/credit risk), custody and operational risks, and evolving regulation. A Key Information Document (KID) is available and should be read before making any investment decision. The prospectus, KID and final terms are available at https://bitwiseinvestments.eu/resources/ and contain further information on risks and product features.

PRIOR TO ANY INVESTMENT IN AN ETC ANY POTENTIAL INVESTORS MUST NOTE THAT:

Any potential investors should seek independent advice and should consider the relevant information provided in the base prospectus and final terms relating to the ETCs, in particular the risk factors set out therein.

The invested capital is at risk and losses up to the total invested amount possible. The product is subject to inherent counterparty risk associated with the issuer of the ETCs and may suffer losses, including a total loss, if the issuer fails to fulfil its contractual obligations.

The legal structure of the ETC is that of a debt security. ETCs are traded on stock exchanges, just as other securities. Market prices may differ from the net asset value of the ETC.

The ETC discussed herein is issued by Bitwise Europe GmbH under its Programme for the issuance of Bonds secured by Cryptocurrencies. The relevant base prospectus has been approved by the German Bundesanstalt für Finanzdienstleistungsaufsicht as competent authority under the Prospectus Regulation, whereby such approval should not be construed as an endorsement of the ETC.

The information contained in this fact sheet is provided solely for informational and marketing purposes. Such provision of information does not constitute an offer to sell securities, nor is it an advice, a recommendation or a solicitation of an offer to buy securities.

INVESTORS IN THE U.S.,THE UNITED KINGDOM, OR CANADA

The ETC is not intended to be offered and shall not be offered to any retail investor in the United Kingdom.

This fact sheet does not constitute an offer of securities for sale in the United States and the ETC referred to in this fact sheet may not be offered or sold in the United States absent registration or an exemption from registration.

Information contained in this fact sheet is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering in the United States or Canada, or any state, province or territory thereof, where neither the issuer nor its products are authorised or registered for distribution or sale and where no prospectus of the issuer has been filed with any securities regulator. Neither this document nor information in it should be taken, transmitted or distributed (directly or indirectly) into the United States.

The statements made in this fact sheet are based on evaluations, economic data, own assessments and forward looking statements at the time of the preparation of the fact sheet and are subject to ongoing changes.
