Composition

Why BSOL ?

Fully transparent

BSOL holders receive all staking rewards net of a staking service fee of 28% that is charged by the issuer to cover staking service and other costs.

Real benchmark

The Compass Solana Total Return 90% Index allows for clear assessment of performance against the current SOL staking rewards market rate.

Simple and reliable

Buy and sell like any stock or ETF through your regular securities account. No new account or crypto wallet needed.

Liquidity

Investors in BSOL enjoy daily liquidity on the stock exchange and are not limited by lock-up periods or other technical challenges of crypto staking.

Physical ETP Structure

Units of BSOL are 100% physically backed by Solana (SOL) held securely in cold storage. The private keys never leave custody even during staking.

Institutional-grade Custody

The assets backing the ETP are kept in cold-storage custody and are secured by an independent trustee, thus eliminating issuer default risk.
